

SYX SETUP

Starting the lamp

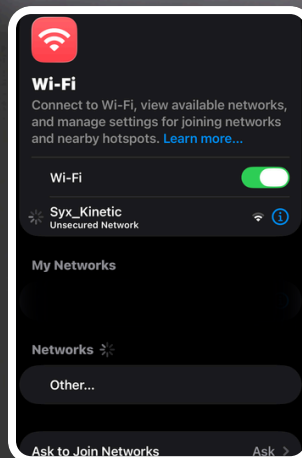

Step 1

Plug your device to power supply

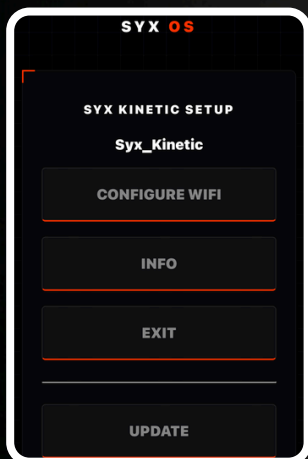

Step 2

Go in your WIFI settings and connect to : **Syx_Kinetic** or **Syx_Luminescence**

Step 3

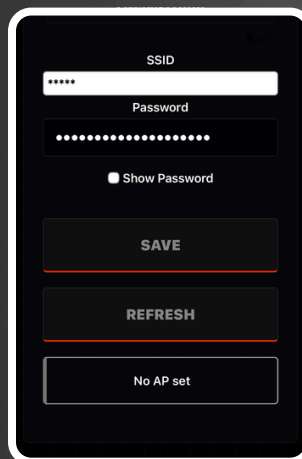

A page will open and then click on configure WIFI

Step 4

Choose your WIFI, enter your password and then click on save

The page will close automatically

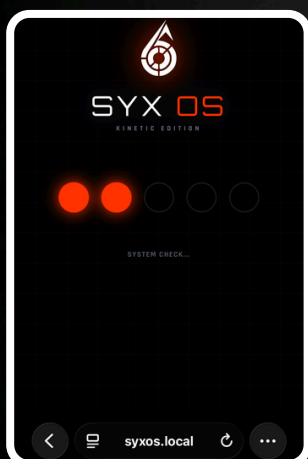

Once connected to WIFI your lamp must make a light animation and a blue led inside the lamp must stay on

If not, go back into your WIFI settings and try again the setup

Step 5

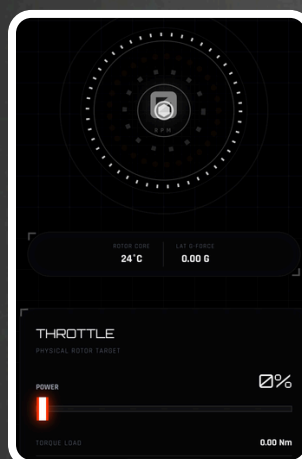

Go into your web browser on PC or Smartphone and search : **syxos.local**

On PC the page can be blocked due to antivirus program

Step 6

The interface will open itself and you can control your lamp from there
